Cut Rates

Rate Reduction Aids Those Who Use Electric Devices

A third step of the $77,000 rate reduction to residential lighting customers announced by the Virginia Public Service Company in September 1934, will become effective for electric service rendered in April and reflected in meter readings made on and after May 1, 1935, it was stated today by A. J. LeRoy Jamerson, local manager of the company.

The principal change in the new schedule will be made in the first block. Instead of 70 kilowatt hours being computed at 7.5 cents, 50 kilowatt hours will be charged at 7.5 cents and the next 40 at 5.0 cents.

According to Mr. Jamerson, the latest rate reduction further helps the residential customer to use all kinds of current-consuming devices at a lower cost per kilowatt hour.

The first reduction was announced and made effective in September, 1934, the second January 1, 1935, and th third for April 1. The fourth will be made in September 1935.

Must Announce

Town elections will be held in Appomattox on the second Tuesday in June. The law requires candidates to file notice 60 days before the election, in this case by April 12.
